AMENDMENTS TO THE SPECIFICATION:

Replace paragraph [0067] on page 15 with the following amended paragraph:

[0067] An entity bookmark 212 is a collection of references that may be used to provide an addressing mechanism that allows the user <u>of</u> an entity to access local or remote locations or services. In an embodiment of the present invention, bookmarks 212 may be, for example, Universal Resource Identifiers (URIs), as shown by bookmarks 232, 234, and 236. A URI is a compact text string that may point to an abstract or a physical resource. One or more URIs may be included in bookmarks 212.
